## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 4 and 11 are objected to because of the following informalities: in claim 11, line 3, the phrase "a bridged or" and the second "an unbridged" should be deleted since the metal complex of formula I only represents an unbridged complex.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 103***

2. Claims 1 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hoang et al. (US 6,583,082) in view of Gillis et al. (WO 97/38019) for the same rationale as set forth in the previous nonfinal Office Action mailed November 1, 2007.

### ***Response to Arguments***

3. Applicant's arguments filed February 25, 2008 have been fully considered but they are not persuasive.

Applicants' argue that it is not obvious to combine Hoang's teaching with Gillis' teaching since Gillis discloses metallocene catalyst  $\text{Cp}^1\text{R}^1_{\text{m}}\text{R}^3_{\text{n}}\text{Y}_{\text{r}}\text{MX}_8$  to be activated entirely by borate type of cocatalyst. Applicants' arguments is irrelevant since Gillis' teaching is cited here for its general teaching of preparation of ethylene/ $\alpha$ -olefin/vinyl norbornene terpolymer in the presence of a metallocene catalyst being well established in industry.

Applicants' arguments regarding Example 4 and Comparative Example C are irrelevant because those arguments fail to address any of the issues raised in the rejections of the previous Office Action.

In view of the forgoing, the rejections under 35 U.S.C. 103(a) are still deemed to be proper and thus maintained.
